Round 2- L1 Interview

- 18 students were shortlisted for this round.
- This round was entirely based on problem-solving ability.
- The interviewer asked me to introduce myself and I told about my technical skills and internships.
- Then he asked me about data structures and which language I used for coding.
- The interviewer asked me to share my screen and solve some questions. I was given the freedom to search syntaxes or libraries. The questions for problem-solving were:-
 - If marks and roll numbers of students are given sort the marks and roll numbers in the ascending order of marks.
 - <https://www.geeksforgeeks.org/find-the-smallest-positive-number-missing-from-an-unsorted-array/>
 - I was also asked questions related to C++.

→ I was asked to code on any compiler and share my screen while coding.
