ISS Governance Interview Experience 2022- Super Dream

1st August 2022
Pre Placement Talk
Started at 3:00pm

5th August 2022
Aptitude Test
we were told it would start at 9:00am but it started around 9:45am
- 70 questions - 30 aptitude, 30 Java based, 10 Python based.
- Duration: 90 mins.
- Aptitude questions were based on quants and logic.
- Java had a lot of questions based on predict the output and basic OOPs concepts.
- For Python the questions were mainly focused on lists and various mutations.

The results for the aptitude test were declared at 1pm.

Technical Interview Round
It started around 1:30pm
- There were 27 students shortlisted for the next round.
- We were distributed in 4 groups.
- Some panels had virtual interviews in the college while the rest had face to face. Mine was later
- The questions were mainly based on the job preferences we had selected.
- Mine were based on frontend development and SQL.
- I was even asked questions about basic concepts of Java and data structures in Java.

HR Interview Round
It started at 4:00pm
- It was the simplest round for me.
- At first they asked me to explain in short about my resume.
- This was followed by questions about my family and my plans for the future.
- There were a few basic HR questions, one can look them up on google.
- The last question they asked was, "Do you have any questions for us?". This is your time to shine. Try showing them that you are really interested in the work they do and you fit in perfectly.
- Whatever you do, just be confident and look after your body posture, it can tell a lot about your personality.
